## EXIT RANGE: AGRIPHAR PRODUCTS FOR DOMESTIC USE

THE AGRIPHAR GROUP IS MAINLY KNOWN FOR ITS AGRICULTURAL PRODUCTS. HOWEVER, THIS IS NOT THE COMPANY'S ONLY AREA OF ACTIVITY. AGRIPHAR ALSO OFFERS PRODUCTS TO PROTECT STORED FOODSTUFFS AND WOOD, GARDENING-RELATED PRODUCTS AND «HARMFUL» INSECT CONTROL PRODUCTS TO PROTECT THE HOME.

Explanations by *Marc DUBOIS*

### What exactly are these insects?

The most famous of these harmful insects is known for the shrill sound of its wings and its appetite for blood. This is, of course, the mosquito, which breaks into our bedrooms on warm nights in search of its sleeping victim.

Yet the mosquito is not the only unwanted guest in our homes... It is joined by flies, fleas carried indoors by domestic pets, bed bugs and cockroaches, which colonise the dark spaces behind skirting boards and hollow walls. That's not to mention wasps, which make their nests in the most inaccessible places in the home. And at some point, we've all spotted armies of ants working away around our homes. They are little cause for concern when outdoors, but once they come inside, they can quickly upset the established order!

### EXIT: the solution!

Agriphar offers a solution to all these minor inconveniences. The Liege-based company understands that each situation in our daily lives is different, and has created a flexible range of products under the name «EXIT». Whether in powder or liquid form, and in ready-to-

With the EXIT range, Agriphar offers a solution to the minor inconveniences caused by both invasive and non-invasive insects.

use or concentrated format, the EXIT range offers remarkable, targeted results.

The range comprises a series of technologically-advanced formulations, including micro emulsions, emulsions, concentrated suspensions, aqueous emulsions, suspo emulsions and powders, all of which are the result of innovative design.

### A mass market product

Although some products are aimed at professional cleaning and pest control companies, the majority of the EXIT range is designed for general public use, with products sold in garden centres and supermarkets. This is why Agriphar has focused its research on user and environmental safety, going beyond the basic safety requirements of biocidal products for domestic use.
